## SUMMARY

DevOps Engineer with 3+ years of experience building and operating cloud platforms across AWS and Azure, delivering reliable systems from infrastructure provisioning to production operations at scale. Engineers EKS-based deployment pipelines with Jenkins and IAM, establishes consistent environments using Terraform, and secures delivery through CI/CD workflows with integrated secrets management practices. Enhances system visibility using Prometheus, Grafana, and CloudWatch, while automating Linux operations with Python and Bash to reduce operational overhead and maintain stable, high-throughput distributed systems.

## TECHNICAL SKILLS

**Cloud & Platform Engineering:** AWS (EC2, EKS, Lambda, IAM), Azure (AKS, VNets, Storage, Virtual Machines), Cloud Networking, High Availability, Disaster Recovery

**Containerization & Automation:** Docker (Images, Compose, Registries), Jenkins, GitHub Actions, GitLab CI/CD

**Infrastructure as Code:** Terraform (Modules, Workspaces, State Management), CloudFormation, Ansible (Playbooks, Roles, Inventory), Configuration Management, Immutable Infrastructure

**Monitoring & Reliability:** Prometheus (Metrics, Alerting, Exporters), Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch, Incident Management

**Security & Systems Engineering:** Linux (Ubuntu, RHEL, Bash, System Administration), DevSecOps (IAM, RBAC, Vault, Encryption), Python Automation, Networking (TCP/IP, DNS, Firewalls), Git

## PROFESSIONAL EXPERIENCE

**DevOps Engineer, Recorded Future**

Jan 2025 – Present | Remote, USA

- Designed AWS EKS pipelines for threat intelligence ingestion, managing container deployments with Jenkins and IAM policies, increasing release throughput by 28% across multi-environment production clusters.
- Provisioned infrastructure using Terraform modules and remote state, standardizing environments for enrichment services, reducing configuration drift and enabling consistent rollouts across staging and production accounts.
- Developed Prometheus-based observability for real-time threat detection pipelines, integrating CloudWatch metrics and building Grafana dashboards to surface anomalous IOC patterns and quickly accelerate incident triage.
- Developed GitHub Actions CI/CD workflows for intelligence delivery services, integrating security scans, Vault-based secrets management, and RBAC enforcement, reducing failed deployments by 19% across critical production releases.
- Automated Linux operations using Python and Bash for cluster maintenance and patching, improving platform stability while decreasing manual intervention for on-call engineers during peak traffic.

**DevOps Engineer, HighRadius**

Jan 2021 – Dec 2022 | HYD, India

- Built Azure AKS clusters for receivables processing services using Docker images, enabling scalable deployments and reducing release cycle time by 32% across distributed financial application environments.
- Automated configuration management using Ansible playbooks for finance workflows, ensuring consistent environments and reducing configuration-related defects by 21% across development, testing, and staging systems.
- Configured Azure networking including VNets, subnets, and load balancers to support transaction processing systems, improving service availability and optimizing inter-service communication across distributed financial microservices.
- Maintained GitLab CI pipelines for invoice automation services, managing build, test, and deployment stages, ensuring reliable integrations and consistent delivery across multiple environments supporting finance operations.
- Implemented ELK Stack-based logging pipelines centralizing application and infrastructure logs, enabling faster root cause analysis and improving troubleshooting efficiency by 26% across production incidents affecting finance services.
- Administered Linux servers handling performance tuning, patching, and access controls, resolving infrastructure issues and maintaining stable runtime environments for enterprise financial applications processing transactions.

## EDUCATION

**Master of Science, ST Francis college**  
Computer Science

Sep 2023 – May 2025 | NY, USA

**Bachelor of Technology, Nova College Of Engineering And Technology**

Jul 2017 – Apr 2021 | TG, India
